

KOnfirmed

Your Managed Device Collection Service

SIMPLIFY IT LIFECYCLE SERVICES WITH
A SMARTER, SUSTAINABLE SOLUTION.

THE PROBLEM

For many organisations, managing IT equipment at the end of its lifecycle can be;

Time-consuming

Ad-hoc, reactive collections across multiple sites can take up valuable time and resources.

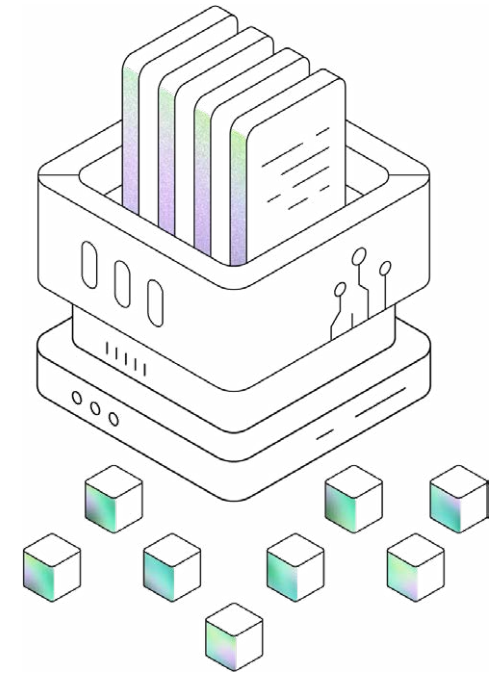

Risk-prone

Inconsistent processes can expose compliance and data security issues.

Unsustainable

Without a structured approach, valuable assets often end up wasted instead of reused or recycled.

Customers need a solution that's secure, repeatable, transparent, and planet-positive. That's where KOnfirmed comes in.

OUR SOLUTION

Set a schedule that suits you

Together we design a collection plan that fits with your business, it can be monthly, quarterly, or annually. Our flexible team adjusts as your needs evolve.

Hassle free logistics

The KOcycle secure transport network collects devices from any site, maintaining a full chain of custody. Every collection includes two KOcycle engineers, meeting ADISA 8.0 standards for quality and security.

Processed to the highest standards

Devices are wiped to Blancco certified standards, assessed by experts, and then either: refurbished for reuse, recycled responsibly, or donated through Project KODI, KOcycle's social impact initiative.

Full visibility and reporting

You and your team get full visibility through the KOcycle Portal with real-time tracking, reporting, and certification for every asset, across every site.

THE BENEFITS

No More Ad-Hoc Headaches

Regular, predictable collections keep your IT estate tidy and compliant.

Full Compliance & Security

KOcycle ensure secure data destruction and fully tracked logistics for peace of mind.

Sustainability Built In

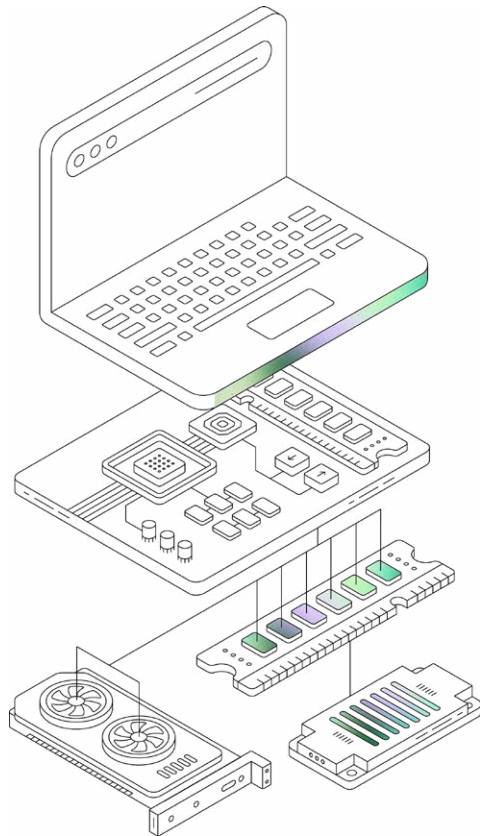

Prioritising reuse and recycling helps you hit ESG and CSR targets.

Time & Cost Savings

Free your IT and facilities teams from managing complex collection logistics.

THE PROOF

1000+

Collections

300,000+

Assets processed a year
